QuickSplint is Practical, Affordable & Reimbursable

QuickSplint gives dentists the ability to offer their patients an immediate solution for pain and protection. It's all about better patient care – and your practice can financially benefit. At only \$20 per unit, QuickSplint is affordable, and in most cases, it's reimbursable by insurance (varies state to state). Instruct your office manager to bill for QuickSplint under the most appropriate code. In some instances, you can bill up to \$199. Most dentists charge \$100 and provide a \$100 credit toward a final device.

For example, when you utilize QuickSplint for:

- **Same-day treatment for acute jaw pain, orofacial pain**
(D9110, D7899, D9930, D5937, D1999)
- **Diagnostic aid for bruxism**
(D8210, D0160, D0170. Trial helps motivate patient to get a full arch appliance for protection.)
- **Post-op healing aid to help jaw muscles relax and recover after a dental procedure**
(D79930, D5937, D7899)
- **Post-op temporary protection for anterior provisional veneers, newly placed implants, periodontal surgery, endodontically treated teeth, and other new dental restorations**
(D5999, D8210. Trial helps motivate patient to get a full arch appliance for protection.)

QuickSplint® 12-Pack - \$240

The QuickSplint 12-Pack contains one dozen QuickSplint units in single patient take-home containers with patient instructions. You can make QuickSplint with any heavy body VPS, or, order our specially-formulated QuickSplint Heavy Body VPS. **Note: to custom fit QuickSplint, fast-set heavy body VPS is required.**
