

# Speed2Treat

Head, Neck & Jaw Pain

## Early Intervention for Acute Head, Neck and Jaw Pain

- Promote healing
- Reduce inflammation
- Prevent pain escalation

### The Speed2Treat Home Healing Kit includes:

### Use our 4-week care plan for common conditions such as:

- ✓ Jaw Sprain/Strain from hyperextension of the jaw
- ✓ Mild whiplash, headache and/or concussion from sports injuries, collisions
- ✓ Blows to the jaw, chin lacerations, slip-and-fall accidents
- ✓ Flare-ups of existing TMJ disorders
- ✓ Headaches, clenching and overuse of jaw and neck muscles

### The Kit is an orthopedic care plan designed by Orofacial Pain Specialists to bridge the medical-dental gap:

- Modify components to fit your practice and your patient's needs
- Aids your differential diagnosis and compliments your rehabilitation program
- Used by urgent care and sports medicine to initiate simple treatment and identify patients for referral to a specialist
- Evidence-based treatment and self-care protocols with supportive pain education helps patients recover at home without prescribed medications.

### Purchase Options:

- Professional pricing available at [QuickSplint.com](http://QuickSplint.com)
- We will DROP SHIP to your patient
- Available at Amazon or [QuickSplint.com](http://QuickSplint.com) for \$125

# Speed2Treat

Head, Neck & Jaw Pain

## Speed2Treat to prevent chronic pain

Analogous to recovery from ankle sprain or prevention of chronic back pain, there is a narrow therapeutic window where prompt therapies for acute TMJ-related injuries have the potential to interrupt the progression from localized pain to central sensitization.

The Home Healing Kit offers a combination of simple treatments, gentle exercises, and self-care measures **to help ease pain, decrease inflammation, and promote healing.**

**We created a self-directed care plan** to support your patient during a 2 to 4 week recovery period. Patients track progress weekly using the **Pain Tracker**, designed for you to monitor symptom improvement or refer to a specialist.

Speed2Treat offers **immediate relief, diagnostic assistance,** and a way to empower your patient at a fraction of the standard cost.

**Head, neck, and jaw pain** affects the ability to do one's best work and be fully present throughout the day. **We supply the peace of mind** that comes from knowing you're offering your patient **the proper steps toward pain relief and healing.**

**Clenching, grinding, and persistent pain** can make it impossible to relax the jaw and upper cervical region. **The QuickSplint Night Guard** is designed for immediate delivery and **short-term use** to inhibit muscle guarding and down regulate pain pathways. Easy to make and superior to a boil-and-bite appliance. Compare to an elastic bandage for ankle sprain.

Expertise in craniofacial conditions is not required to provide the Kit.

**Simple treatment delivered at the time of onset - Better than no treatment!**
